

Critical Alert's CommonPath™ Nurse Call Platform Named Finalist in the 2014 iAwards for Connected Health

Company to present at Wireless-Life Science Association Convergence Summit

Jacksonville, Florida (April 29, 2014) – Critical Alert Systems was named one of the top 12 finalists for the 6th Annual TripleTree iAwards for Connected Health. Critical Alert's CommonPath™ nurse call platform was selected from a field of over 60 product entries from leading healthcare technology companies around the world. CommonPath was selected based on how its transformative software solutions address the most pressing needs in today's healthcare environment by enriching clinical care delivery and improving operating efficiency. As part of this recognition, Critical Alert will be a presenter at the 9th Annual Wireless-Life Sciences Alliance (WLSA) Convergence Summit in San Diego, May 14-16.

"Our CommonPath software platform represents next-generation technology that empowers hospitals to create a customized clinical communications system that improves patient care and satisfaction as well as staff effectiveness," said Critical Alert CEO Ed Meyercord. "Our unique approach of embedding native middleware into our software platform allows hospitals to have robust integrations with other networked systems without incurring the usual expense of bringing in third parties to make that happen."

The TripleTree iAwards were created to recognize exceptional companies that are demonstrating innovation via healthcare solutions that leverage mobile, wireless, social or cloud based delivery models. Applicants are evaluated on a range of criteria including the clinical, operational or consumer relevance of their solution, as well as marketplace traction, functional uniqueness, size of addressable market and international presence.

"We appreciate this recognition from the Triple Tree team," added Meyercord. "We would like to thank all of our hospital customers who drive product innovation at Critical Alert as well as our employees who make these customers their number one priority every day."

About Critical Alert Systems

Critical Alert designs and delivers the most technologically advanced, easy-to-use nurse call solutions on the market. Using native middleware, our CommonPath™ nurse call allows clinicians to enhance their workflows, lower costs, improve staff performance, and raise patient satisfaction. Our systems capture and store all events and patient interactions allowing hospitals to generate relevant and customizable reporting with real-time dashboards. Critical Alert also provides fast and reliable critical messaging for emergency medical and disaster response teams in 13 states in New England and the central southeastern U.S. More information is available at www.criticalalertsystems.com.
